

	<p>Within an organisation, The Heart of Leadership © workshop offers a powerful mechanism to accelerate and provide reflection time to a leader’s development journey, effectively supporting other key organisational initiatives. The workshop introduces a leadership language through the models and concepts discussed, and allows for reflections on where personal leadership needs to shift within the organisation.</p>
<b>What will be covered?</b>	<p>All participants should discover something about themselves that they did not know, gain key insights into how they can have a greater leadership impact and understand, at a ‘heart’ level, some of the critical issues that are associated with influencing a community of people to move towards a higher objective. The day unfolds in conversation, collaboration, laughter and insights through activities, robust theory underpinning the principles, peer coaching and self-discovery. This is guided by an accredited facilitator who will ensure the energy, framework, timekeeping and topics all weave together to form a day that guides people to become better leaders. They will be ready to move into the world as catalytic change agents to ignite a ‘fire into the belly’ of the people they choose to lead.</p>
<b>Who should attend</b>	<p>The Heart of Leadership© is a catalytic one-day workshop that ignites a ‘fire in the belly’ of individuals who wish to stand up and make a difference in their world.</p>
